Adventure Abroad

We challenge the status quo in everything we do. We believe in thinking differently. The way we do this is to provide exclusive services, uncompromising luxury and premium adventure experiences.

I founded Adventure Abroad because I wanted to offer the most inspirational adventure experiences to the world. I wanted exclusive benefits, VIP experiences and a little bit of luxury, something that I could not find but so desperately wanted. I did not want to be another man on another trek.

With exclusive insider access, Adventure Abroad can provide experiences money simply cannot buy. From helicopters out of Everest Base Camp landing at our Himalayan day spa to beds inside your heated tents on Mt Kilimanjaro. The combination of expertise and luxury creates our truly memorable travel experiences.

We believe in providing value in everything we do.

Our Favorite Itinerary

Traditional Norwegian cuisine is largely based on what is naturally found in its mountains, forests, and coasts. Preservation also plays a large role in Norwegian cuisine, birthed from a need to survive long harsh winters. Many dishes are pickled, cured, and fermented.

Due to much of Norway being surrounded by the sea, Norwegian food has a much stronger focus on fish and seafood than the rest of its landlocked European fellows.

In keeping with the Norwegians' culture of working with what nature has to offer, there is a strong focus on game meat as well, so expect to encounter game meats such as moose, reindeer, hare, duck, and various fowls
